

During the week of July 21 to July 25 2008 I participated to the JUSTIPEN-EFES-Hokudai-UNEDF meetings in Onuma Park, Hokkaido, Japan.

At the meetings I presented two talks:

1. *New Approaches to Configuration Interaction*, M. Horoi, Hokudai-TORIJIN-JUSTIPEN-EFES workshop & JUSTIPEN-EFES-Hokudai-UNEDF meeting, July 21-25, 2008, Hokkaido, Japan.
2. *Accurate Nuclear Level Densities for Nuclear Reactions*, M. Horoi, Hokudai-TORIJIN-JUSTIPEN-EFES workshop & JUSTIPEN-EFES-Hokudai-UNEDF meeting, July 21-25, 2008, Hokkaido, Japan.

I provided electronic copies of my talks to T. Otsuka, one of the meetings' organizers.

During the meetings I have very good discussions on scientific subjects of common interest with T. Otsuka, H. Nakada, Y. Utsuno, K. Kato, S. Chiba, C. Barbieri, M Ploszajczak, and others. Some of these discussions pointed my research related to the UNEDF collaboration to new and interesting directions.
