• If you are having problems with CAPA or with the course material please see Dr. Greene after class or make an appointment.

• Dr. Greene will try to respond to “simple“ physics questions that are sent by email. However, experience has shown that it is very difficult, and highly inefficient, to address complex conceptual issues by email. If you have a question, please see Dr. Greene after class or make an appointment.

• The first problem set is now on line. This problem set will be due at 0800h on Monday 10 September. (Problems sets will usually open at noon on Monday and close at 0800h on the following Monday).
