General Information
Lecture Hours: 8:00 – 8:50 am Mon/Wed/Fri
Location: PH415
Office Hours: 1:00 – 2:00 Monday or by appointment
Laboratory Hours: as scheduled for your section
Textbook: Young & Freedman, University Physics, 12th Edition with Modern Physics

General Course Description
This class is a continuation of Physics 231. This course covers material concerning oscillations, waves, sound, light, optics, special relativity, quantum mechanics and basic aspects of modern physics (atomic, molecular, solid state, nuclear and particle physics).

Prerequisites
Physics 231 is a prerequisite. The course and text presume a familiarity with calculus and calculus concepts. A background in mathematics up to the level of Math 141-142, or equivalent, is highly recommended and is probably necessary for success in the course.

Course Repetition Policy
If you are repeating the course, please refer to the Laboratory Policy Regarding Repeating a Course (http://www.phys.utk.edu/labs/Lab%20Repeat.pdf)

Announcements, Lecture Notes, Course Updates: http://online.utk.edu
Aside from in-class discussion, the primary method of communication between you and me will be via Blackboard and/or email. This syllabus and other important information and announcements will be posted there, as well as copies of the slides used in lecture. Your grades of in-class exams will be posted in the Blackboard Grade-book, and your grades will be available for only you to see. The homework website, WebAssign, is entered from the tools menu on Blackboard. At the end of the semester, your homework and laboratory grades will also be posted on Blackboard, along with your final grade. To log into Blackboard (http://online.utk.edu), you use your university username and password. The course name is: Physics232_2012_spanier
It will be your responsibility to be aware of the content of any communication taking place in class, be it an announcement or anything related to the course material, in case you missed a class.
**Grading Policy**

The semester Grade will be based on a Weighted Averages of the homework assignments, the laboratory, two best out of three one-hour tests, and the final examination as follows:

<table>
<thead>
<tr>
<th>Homework</th>
<th>25%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Laboratory</td>
<td>25%</td>
</tr>
<tr>
<td>Two of three 1-Hour In-Class Tests</td>
<td>30%</td>
</tr>
<tr>
<td>Final Examination (2-Hour test)</td>
<td>20%</td>
</tr>
</tbody>
</table>

*Homework* sets will be assigned On-Line using WebAssign. The homework website, WebAssign, is entered from the tools menu on Blackboard. You will need to purchase an access code for WebAssign. You should always enter the WebAssign site via the Tools menu on Blackboard. This is especially true when you sign up for the WebAssign class initially, as this will assure that you enter the WebAssign course correlated with our course. Each problem set will generally be available on-line at 12:00 (noon) each Monday and will be due at 8:00 am on the following Monday. Exceptions (for example at Spring Break) will be noted in class. **Due dates for problem sets are firm. Please note: No extensions or make-up problem sets will be given. In lieu of extensions, the two lowest scores on homework sets will be dropped from the average.** I generally encourage students to work together as far as homework is concerned. The goal is to use homework as one of the most effective ways of assimilating the material. Do not take advantage of the work of other people, and do not let anybody take advantage of your own work: efforts should be shared.

*Laboratory attendance is strictly mandatory.* Work will be graded by each Lab Instructor independently. An effort will be made to ensure a uniform grading policy between different laboratory sections. Laboratory make-ups are entirely at the Lab instructor’s discretion and arrangements for such must be made with the Lab instructor directly. The laboratory exercises are an important and integral part of this course and have to be completed before a final grade will be assigned. You must complete all of the Laboratory assignments. Please note: If you fail the Laboratory part of the course, you automatically fail the entire course. You find the laboratory schedule here: [http://www.phys.utk.edu/physlabs.html](http://www.phys.utk.edu/physlabs.html)

The *In-Class Tests* will be closed book exams, but a list of useful equations and constants will be provided. Questions and Problems on the Short Tests and Final Exam will generally NOT require only a purely numerical answer (like the homework). Short Test and Final questions will generally be similar in character to example problems in the book and example problems given in lectures. For the Short Tests and Final Exam you are required to bring a pencil and a non-programmable pocket calculator. In particular, no laptops, cell phones, or other means of communication are allowed. Please note that your lowest 1-hour test score will not count toward your final grade. Hence, one test may be missed for any reason without penalty. In the event you miss a test, it will be considered the low score and will be dropped in the grade determination. Consequently, **NO MAKE-UP 1-HOUR TESTS WILL BE GIVEN.**
The **Final Exam** is mandatory. It is comprehensive, i.e. you will be tested on the whole material covered in class, homework, labs and previous tests. Missing the final exam is very serious and may well result in failure of the course. However, if there are extremely serious circumstances supported by proper documentation, a make-up for Short Tests and/or Final may be considered at my discretion.

### Conversion to Letter Grades

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90 - 100</td>
</tr>
<tr>
<td>A-</td>
<td>85 - 89</td>
</tr>
<tr>
<td>B+</td>
<td>80 - 84</td>
</tr>
<tr>
<td>B</td>
<td>75 - 79</td>
</tr>
<tr>
<td>B-</td>
<td>70 - 74</td>
</tr>
<tr>
<td>C+</td>
<td>65 - 69</td>
</tr>
<tr>
<td>C</td>
<td>60 - 64</td>
</tr>
<tr>
<td>C-</td>
<td>55 - 59</td>
</tr>
<tr>
<td>D+</td>
<td>50 - 54</td>
</tr>
<tr>
<td>D</td>
<td>45 - 49</td>
</tr>
<tr>
<td>D-</td>
<td>40 - 44</td>
</tr>
<tr>
<td>F</td>
<td>0 - 39</td>

</tbody>
</table>

**Textbook**

**Course Material**

The class covers most of the materials described in chapters 13,15,16,32-44 of the textbook. Anyhow, this course consists of several components: lectures, laboratories, homework problems, and reading assignments in the textbook. The material you will be expected to learn and will be tested on during the exams will be taught to you as part of all of these course components. In particular, I stress the importance of problem solving and carefully working (not just reading) your way through all the parts of the textbook. Reading the relevant chapter or sections for each week’s lectures (i.e. Reading assignments) is a compulsory and vital part of the course. **The lectures will NOT just repeat the material in the textbook**, but will be rather used to discuss the course material in a variety of ways. Some lectures will follow the textbook, some other will discuss topics not covered in the textbook, and/or discuss them in a different manner.
**Reading Assignments**
Chapter 13 Oscillations, Simple Harmonic Motion
Chapter 15 Mechanical waves
Chapter 16 Sound
Chapter 32 Electromagnetic Waves
Chapter 33 Light
Chapter 34 Geometric optics
Chapter 35 Interference
Chapter 36 Diffraction
Chapter 37 Relativity
Chapter 38 Photons, electrons and atoms
Chapter 39 Wave nature of particles
Chapter 40 Quantum mechanics
Chapter 41 Atomic structure
Chapter 42 Condensed matter
Chapter 43 Nuclear physics
Chapter 44 Particle physics

**Questions and Appeals**
I encourage you to ask questions during the lecture or and talk to me during my office hours (Monday or by appointment – just ask after class) about the subject.
You can discuss with me and/or complain to me about the grading of a given assignment, be it homework, Lab grade, Short Tests or Final Exam. Any appeal will be entertained if it is raised no later than one week after the date on which the graded Exam/ Lab/ Tests /HW are made available for return to the class. After this “appeal period” of one week, exam grades will be considered final and will not be altered. Any appeal concerning a grade in the Laboratory should directly be discussed with your Lab. instructor.

**For students with disabilities**
If you need course adaptations or accommodations because of a documented disability, please contact the Office of Disability Services at 2227 Dunford Hall (telephone/TTY 865-974-6087; e-mail ods@utk.edu) by January 16. This will ensure that you are properly registered for services.

**Academic Honesty**
*All work submitted by a student is expected to represent his/her own work. Students are expected to enter their own homework without assistance from others. Students are expected to perform all work in conformance with the University policies regarding Academic Honesty.*
